DECONTAMINATION/STAGING SITE ASSESSMENT

Facility Name :	Middle River (Slidell)	Facility Location ID:	SlIW01
Assessment Date :	10/4/2010	Incident Name :	BP Spill
Physical Location :	Highway 90		
City, State :	Slidell , LA	County :	St. Tammany

ASSESSMENT INFORMATION

General Site Information and Observations	
1. All waste stored in lined rolloff boxes?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> N/A
2. Rolloff boxes covered after filled (or end of day)?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> N/A
3. Any evidence of oily waste or oily waste waters?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> N/A
4. If yes, was it adequately addressed?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> N/A
5. How many samples were collected?	1
Additional Comments : <p>WASR arrived at the Slidell Mid - River staging area at 0840 hours and met with Heritage (Keith Tinsley), Environmental Standards (Megan Filipovits), and AECOM (Zoe Knesl). WASR walked the site to observe site operations and determine which frac tank and roll-off would be sampled. Heritage indicated that their site is scheduled to shut down within three weeks. Site operations consist of staging and preparing boom for transfer to Covanta (Tulsa, OK). The site had 3 frac tanks (1 empty, 1 containing potable water, and 1 containing 40 barrels of decon water) and 25 roll-off boxes (1 containing recyclables, 1 containing municipal waste, 4 empty, 3 containing oily debris, and 17 containing boom awaiting transport to Covanta). The site did not have an adequate amount of liquid waste for sampling. WASR determined that roll-off# RT-145 would be sampled. Three bags were chosen (1 containing PPE, 1 containing hard boom interior, and 1 containing decon padding). At 1040 hours, WASR began sampling oily debris, split samples are collected for the AECOM rep. Sampling was completed and team cleaned the sampling area at 1150 hours. The Heritage rep. was made aware of labeling issues for hazardous materials (recyclable batteries). At 1215 hours, WASR departed for the Mid-River staging area.</p>
